SYSTEM DESIGN CHALLENGE

ArchVerse: API Cheat Sheet

Fill this at the 0:45 checkpoint. The judge types these values into the Testing Dashboard.

A. SETUP

Team name Dashboard: Team name (for the report)	
Problem statement Dashboard: Problem Statement dropdown	[ ] PS 1 Ravi Canteen [ ] PS 2 Seminar Hall [ ] PS 3 Ride-Sharing [ ] PS 4 Coupon Drop [ ] PS 5 Chai Stall
Base URL Dashboard: Team's Base URL (open it in a browser to check the port)	

B. ENDPOINTS

View path (GET) Dashboard: View Endpoint Path	
Reserve / Claim path (POST) Dashboard: Reserve / Claim Endpoint Path	
Status path (PATCH) Dashboard: Status Update Path (record ID as {{ID}}, e.g. /orders/{{ID}}/status)	

C. PAYLOADS (write the student ID exactly as {{USER_ID}})

Race payload Dashboard: Race payload (valid body for a NEW student)	
Idempotency payload Dashboard: Idempotency payload (valid body for a student)	
Invalid-item payload Dashboard: Invalid-item payload (item that does NOT exist)	
Cross-booking payload Dashboard: Cross-booking payload (same student asks for a SECOND, different item). Write not needed if your rules do not require it	

D. STATUS

Status payload Dashboard: Status payload (status as {{STATUS}}, ID as {{ID}} if in the body)	
Status sequence (exact spelling) Dashboard: Status sequence (comma separated, exact spelling)	
Status right after reserving Dashboard: State after reserve (0 = first status, 1 = second, ...)	

E. CHECKS

CORS enabled Dashboard: All origins, GET POST PATCH OPTIONS, header Content-Type	[ ] YES [ ] NO (fix before code freeze)
Seeded item IDs (give two) Dashboard: Two IDs that exist in your seeded data	
Stock at server start Dashboard: Race: stock available	

F. PROBLEMS FOUND (from the AI answer). Tick each one when fixed.

[ ] View response has no stock number	[ ] Reserve response has no record ID
[ ] A failure returns 200 instead of a 4xx code	[ ] Status route is not PATCH
[ ] CORS missing for PATCH or OPTIONS	[ ] Database is not reset when the server starts

JUDGE USE ONLY	[ ] Server restarted before run [ ] Dashboard run done Score: _____ Judge: _____

Reminders: Restart your server right before the judge's run (tests use up stock). Status names must be spelled exactly as in your problem statement. Write {{USER_ID}}, {{ID}} and {{STATUS}} exactly like this, with double curly braces. Mark anything the AI says is MISSING and fix it before code freeze.
